ABSTRACT

The Association of American Medical Colleges conducted a survey by means of a questionnaire in 1970-71 to determine the salaries of medical school faculties. Ninety-three schools submitted returns; salaries for 4,366 basic scientists and 12,701 clinical scientists are reported. The areas covered include strict full-time faculty by department, and base salaries and total income geographic by department. Information concerning geographic arrangements has some discrepancies, since a number of schools and departments failed to report the variable component of the salary derived from fees for professional services. These figures reflect only the salary provided through the medical school for professional services for teaching, service, or research, and do not reflect total income. (JMF)

ASSOCIATION OF AMERICAN MEDICAL COLLEGES

Foreword

We are pleased to present the results of the Annual Salary Questionnaire for medical school faculties for the fiscal year 1970-71. Ninety-three schools have submitted returns on faculty members. Salaries of 4,366 basic scientists and 12,701 clinical scientists were reported in this survey.

This study began as an internal document for the assistance of the administrative authorities in management. Today there is a good deal of pressure to extend the use and influence of the survey. In light of this, the importance of the accuracy of the reported data needs to be emphasized. The accuracy of the report depends upon the accuracy of the returns. In recent years, the Business Officers Section of the AAMC has helped to improve the quality, participation, and efficiency of the data collection.

Information concerning the salaries of strict full-time faculty is reasonably complete and is reliable. The information concerning geographic arrangements have some discrepancies, since a number of schools and departments failed to report the variable component of the salary derived from fees for professional services. These discrepancies appear in the calculations of totals for geographic full-time faculty, and the ranges, averages, and means for these figures do not reflect the true figures. Only by improving the reporting for this category of faculty can significant data be obtained in the future.

These figures do not necessarily reflect the total income of the faculty, but only the salary provided through the medical school for professional services for teaching, service, or research. Supplementary forms of income such as honoraria, consultation fees, and lectureships are frequently not included in salary returns.

Other sections of the annual survey will be circulated in the near future.

Thomas J. Campbell
Assistant Director
Division of Operational Studies
